EASY ALGAE CONTROL FOR YOUR POOL

There's Only One Nature2

REDUCES CHLORINE
USE UP TO 50%

DESTROYS
ALGAE & BACTERIA

DECREASES POOL
MAINTENANCE

A BETTER WAY

Nature2[®] Express is a simple mineral dispensing system that uses the power of minerals like silver and copper to destroy harmful bacteria and algae — giving you cleaner, clearer water you can enjoy while reducing chlorine use.

Continuous Pool Protection

Controlled Release Technology (CRT) automatically dispenses the right amount of mineral ions into your pool water as needed. No stains, guaranteed!

The Perfect Pair

The mineral sanitizers in Nature2 Express work in conjunction with your pool's filtration system to deliver brilliantly cleaner, clearer pool water.

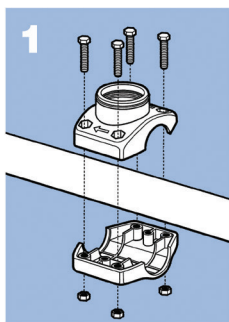

Hassle-Free Algae Control

The powerful minerals in Nature2 destroy bacteria and control algae for up to 6 months in pools. Plus, replacing your cartridge is simple so you can experience uninterrupted indulgence of your pool.

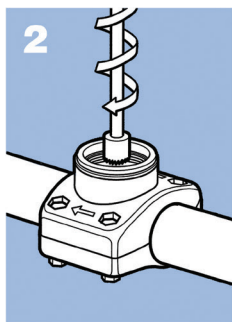

Simple Do-it-Yourself Setup

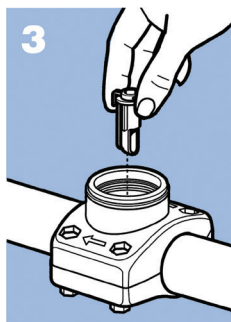

Nature2 easily installs into your return line, so all you have to do is activate the cartridge and let it do the rest.

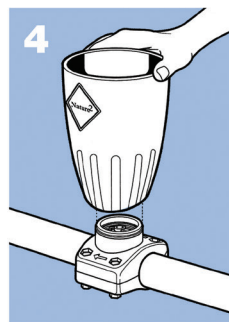

1 Turn pool pump off. Secure clamp assembly on the return line. For above-ground pools with corrugated pipe, use enclosed PVC adapter.

2 Cut hole in rigid PVC pipe using a power drill and the enclosed hole saw.

3 Insert the flow diverter into hole and snap it into place.

4 Snap dispenser shell onto clamp.

5 Thread the cartridge into the clamp, turn on pool pump and activate the cartridge. See manual for start up instructions.

A Superb Supplement to Any Pool

Works with Chlorine and Bromine pools. Allows you to use less chlorine, thereby reducing the potential for odors.

SPECIFICATIONS

Pool Capacity: 5,000 to 25,000 gallons

Cartridge Life: Six (6) months

Run Time: Six (6) hours a day minimum

Part number W20086: Nature2 Express I/G 6/PK

Part number W20176: Nature2 Express A/G 6/PK

Part number W28175: Nature2 Express replacement cartridges for I/G and A/G
