WINTER POOL COVER

Ultimate®

WINTER POOL COVER

The Ultimate Cover is constructed with the strongest North American made poly weave material partnered with a band of "patented" Enviro Mesh material to allow rain and melted snow to penetrate through while leaves and other debris are left behind. In the Spring, just remove the cover and vacuum your pool. No standing water on top means no breeding ground for potentially hazardous mosquitoes, as well. This is also a money saver for regions where water is allocated or costly. You can use nature's water to fill your pool.

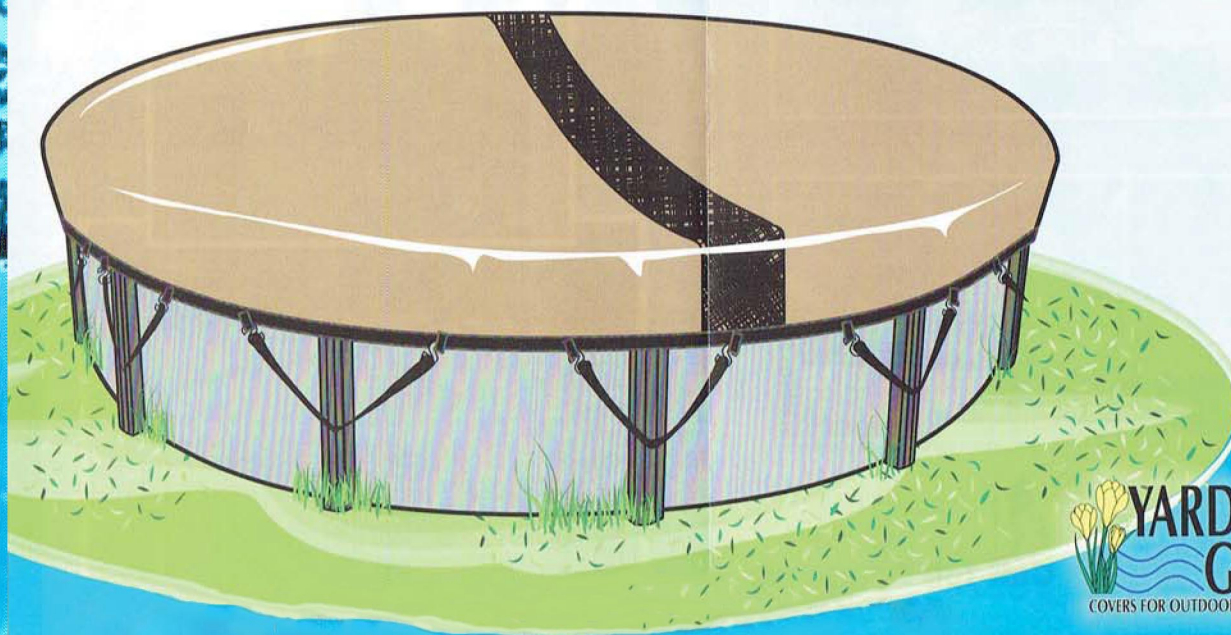

The Enviro Mesh band allows water to drain into the pool while keeping debris out.

Features

- Constructed with the strongest North American made poly weave material - "ArmorKote".
- Fewer seams due to full widths.
- Triple edge reinforced binding around perimeter.
- Finished cover within inches of stated cover size.
- Industrial webbing loops.
- High quality UV stabilized securing straps.
- All covers made in Canada/U.S.A.
- Full size range of standards, rounds, ovals, and rectangles.
- Specials available in either rectangle form or custom shaped to fit any shape and size.
